

ERPNext Success Pack scope

Scope Overview

The Success Pack is designed to provide essential configuration, training, and support for ERPNext implementation with predefined features, services, and limited customizations.

Customization / Consulting Hours

Usage:

- Hours specific to the plan are to be utilized within 2 months from the start of the contract.

Inclusions:

- Designing and implementing only **2 custom print formats** based on your requirements.
- Adding **custom fields** to existing DocTypes to suit your business needs.
- Creating **simple custom DocTypes**, if required.

Exclusions:

- This scope excludes heavy customizations such as extensive modifications to ERPNext's core functionalities or workflows.

Focus:

- Minor adjustments and enhancements to ensure compatibility with ERPNext's standard features while addressing specific requirements.
